WANNER™ HYDRA-CELL® PRO PUMPS

DESCALING SYSTEM / Parts Washer OEM specifies Hydra-Cell Pro

A US-based parts washer OEM was called upon to make a parts washer for descaling large agricultural components after heat treatment. The scale removal called for high flow rates at high pressure. The company only considered one pump, the Wanner Hydra-Cell Pro, due to its seal-less design and excellent reliability.

Wanner Hydra-Cell Pro T100 Medium Pressure pump was selected for the following reasons:

- Seal-less design with no packing to wear or replace
- Reliable operation with less maintenance
- Easier to service

Pump: Hydra-Cell Pro T100
Media: Hot water
Flow: 180 gpm (681 lpm)
Pressure: 2800 psi (193 bar)
