

Application story

WANNERTM
HYDRA-CELL[®] PRO
SEAL-LESS PUMP TECHNOLOGIES

Cleaning with Recycled Solvent (3)

Location	Austria	Hydra-Cell model	G25EKSJHFEHB
Type of application	Cleaning Paint Manufacturing Tanks with Solvents	Flow rate	63 l/m (17 gpm)
Liquid	Recycled Solvents	Pressure	50 bar (725 psi)
Application details	A leading Austrian manufacturer of varnishes, paints and specialised coating materials relies on a Hydra-Cell G25 pump to deliver solvents at pressure for cleaning large paint manufacturing tanks. The tanks have to be completely clean before mixing a new colour. The solvents used in the cleaning process are recycled and contain many small particles which would drastically shorten the life of any pump that relied on mechanical seals. The seal-less Hydra-Cell pump has been in use for seven years and is a very well regarded piece of equipment.		
Advantages of Hydra-Cell pump on this application	Ability to handle non-lubricating liquids with fine particles reliably.
