

Application story

Dosing Water into Beer Bottles

Location	Czech Republic	Hydra-Cell model	G20GDPESFECJ
Type of application	Water Injection into Beer Bottles	Flow rate	0.2 m ³ /hr (53 gph)
Liquid	Water	Pressure	15 bar (220 psi)
Application details	A well-known designer and builder of bottling plants in the Czech Republic previously incorporated traditional dosing pumps to deliver a shot of water into the beer bottle immediately before closure of the cap at the filling machine. This procedure stops the beer from foaming when the bottle is opened. The bottling OEM is now installing the Hydra-Cell G20 pump to inject the water. The G20, with its compact build, saves space on the line and does the job perfectly.		
Advantages of Hydra-Cell pump on this application	Purchase price. Dimensions. Functionality.
