

Application story

WANNER™
HYDRA-CELL® PRO
SEAL-LESS PUMP TECHNOLOGIES

Hydrocarbon Condensate Transfer (2)

Location	Canada	Hydra-Cell model	D35XKSGHFEHH
Type of application	Hydrocarbon Condensate Transfer (2)	Flow rate	Up to 100 l/min (26 gpm)
Liquid	Hydrocarbons Propane Butane Natural Gasoline	Pressure	Up to 83 bar (1203 psi)
Application details	The Hydra-Cell pumps are pumping hydrocarbon condensate. There is increasing legislation regarding the leakage of VOC's (volatile organic compounds) into the environment. The Hydra-Cell is particularly suited to this type of application due to its seal-less design as there are no mechanical shaft seals or packing that will leak. The Hydra-Cell is also well suited to pumping liquids that are non lubricating with a low viscosity.		
Advantages of Hydra-Cell pump on this application	Seal-less design. Ability to handle low viscosity (VOCs).
