

Application story

KOD Knock Out Drum Condensate Transfer

Location	Argentina (Installation: May 2018)	Hydra-Cell model	D66XKSGHFECA
Type of application	KOD Knock Out Drum Condensate Transfer	Flow rate	12K l/hr (12 m³/hr)
Liquid	Natural Gas Liquids	Pressure	2.94 bar (3 kg/cm²)
Application details	The pump must drain hydrocarbon condensates from a Knockout Drain (KOD). The challenges were leakage through the mechanical seal in the previous Progressive Cavity Pump (PCP), with odour present and dry running. To date, the Hydra-Cell pump has been running in normal operation without any breakdown.		
Advantages of Hydra-Cell pump on this application	• Seal-less design is 100% leak-free, ensuring safety for operators and the environment. • Only minimal maintenance and servicing required, saving costs and unplanned downtime.
